

MUSTAPHA ABDULMUJEEB

Senior Fullstack Mobile Engineer (Flutter/Node.js)

+234 814 960 7707 | mostalpha7@gmail.com | Lagos, Nigeria
mostalpha7.github.io | github.com/mostalpha7 | linkedin.com/in/mustapha

PROFESSIONAL SUMMARY

Fullstack mobile engineer with 5+ years building production-grade Flutter applications and backend systems, specializing in fintech and delivery platforms. Proven track record scaling mobile apps to **100K+** downloads, reducing mobile app crash rates by **38%**, while optimizing backend performance. Experienced in leading feature development end-to-end, from mobile UI to backend integration, and mentoring junior engineers.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, iOS (Swift/Xcode), Android (Kotlin), Deployment (Play/App Stores)

Backend Development: JavaScript (Node.js, Express.js), Database (PostgreSQL, Prisma ORM, MongoDB, SQL optimization), GraphQL, RESTful APIs

Frontend Development: Vue.js, React.js, JavaScript, HTML/CSS, responsive design

Tools & Platforms: Git, GitHub, Bitbucket, Jira, Confluence, Postman, Figma, Google Maps SDK, CI/CD

Others: Python, WebSocket Integration, Real-time Tracking, NFC Payments

PROFESSIONAL EXPERIENCE

Benmore Technologies

Chicago, United States (Remote) | Jan 2025 - Present
Fullstack Mobile Engineer (Flutter, Node.js, Express, Prisma, PostgreSQL)

Building scalable mobile and backend solutions for urban logistics and parking-sharing platforms.

Anydrop - Delivery Platform (Ongoing)

- Architected and delivered an end-to-end delivery mobile app in 8 months as sole mobile engineer, integrating real-time GPS tracking for live driver location tracking

- Implemented background location services to stream driver coordinates to backend, enabling real-time tracking visualization for senders with sub-second update latency
- Successfully launched on iOS App Store (Jan 2026) with seamless onboarding, transaction flows and integrated stripe payment gateway.

Parking Spot-Sharing Platform (Ongoing)

- Optimized location-based SQL queries using Haversine function, eliminating third-party location plugins and improving query performance for proximity-based parking spot searches
- Integrated Google Maps SDK and geolocation APIs to enable dynamic map interactions and real-time parking spot availability
- Leveraged Prisma ORM with PostgreSQL for robust database management, ensuring data integrity and scalability in high-traffic environments

Trove Finance

Mobile Application Developer (Flutter)

Lagos, Nigeria (Remote) | July 2021 - Jan 2025

Led mobile development for micro-investment platform enabling users to invest in US and Nigerian financial instruments (stocks, bonds, mutual funds) with social investing features. The platform processed over **₦1 trillion** in transaction volume.

Key Achievements:

- Scaled mobile app to **100K+ Android** downloads and **8.8K+ iOS** downloads, supporting **5-10K monthly** active users
- Improved Android app rating **from 3.88 to 4.02 stars** and reduced iOS crash rate by 38% through systematic performance optimization (2022-2025)
- Architected and built all core mobile features including trading (stocks, bonds, ETFs, crypto), portfolio tracking, savings, social interactions, and educational content (Trove University)
- Implemented real-time data delivery with WebSockets and intelligent caching, improving data freshness, app responsiveness, and reducing API load and backend costs.
- Led development of KYC verification flow using Google's open-source ML liveness detection algorithm, enhancing security and user verification accuracy
- Managed production deployments to both Play and App stores, ensuring smooth release cycles
- Collaborated closely with backend engineers and UI/UX designers to refine product requirements and deliver high-quality features.

Pullen Creatives Limited

Frontend & WordPress Developer

Lagos, Nigeria (On-site) | Dec 2020 - July 2021

Designed and developed high-performance websites and web applications for diverse clients across industries in a fast-paced agency environment.

- Collaborated with UI/UX designers to translate designs into product requirements
 - Built custom responsive frontends using HTML, CSS, JavaScript, and Vue.js framework.
 - Integrated APIs to enhance website functionality and user engagement
 - Customized WordPress themes and plugins to meet client-specific requirements with SEO optimization
-

Success Drive Global Consult

Junior Fullstack Engineer (Node.js, Vue.js, Express.js, MongoDB, Flutter)

Lagos, Nigeria | Jan 2020 - Dec 2020

Contributed to fullstack development of client-facing web and mobile applications across various industries.

- Built dynamic user interfaces using Vue.js and developed backend services with Node.js, Express.js, and MongoDB
 - Assisted in Flutter mobile application development for cross-platform deployment
 - Participated in code reviews, testing, and third-party service integrations to meet project requirements
 - Collaborated with senior engineers during application deployment, maintenance and bug fixing processes
-

Tutors & Learners World

Software Engineering Intern (JavaScript, Python)

Lagos, Nigeria | July 2019 - Dec 2019

Completed intensive training program in modern software development with focus on JavaScript ecosystem (Svelte.js, Node.js, Express.js) and Python programming. Gained foundational experience in fullstack development and MongoDB database management through real-world projects.

TECHNICAL LEADERSHIP & TEACHING

Solvestation Labs

Node.js Instructor

Remote | Jan 2026 - Present

Teaching comprehensive Node.js curriculum covering programming foundations, data structures, web development with Express.js, and database integration with real-world projects. Currently mentoring students through a 4-month structured program.

Curriculum: Programming Foundations → Data Structures & Node.js Basics → Web Development & Express.js → Databases & Real Projects

MGQS IT Lab & Research Centre

Flutter & Dart Instructor

Lagos, Nigeria | 2023 - Present

Leading mobile development education in cohort-based programs, teaching Flutter and Dart fundamentals through hands-on projects and real-world application development.

CONTRACT PROJECTS

CashMobile | Mobile Developer (Flutter)

Contract | 2024

Built Flutter-based mobile banking and payment solution for CashAfrica fintech platform, featuring CashTap - proprietary NFC-powered contactless payment system enabling secure in-store transactions between merchant POS devices and user smartphones.

- Implemented NFC payment functionality for contactless transactions at physical merchant locations
- Integrated mobile money transfers across wallets and bank accounts with comprehensive bill payment features
- Delivered production-ready iOS and Android applications with bank-level security and payment processing

Published On: [Google Play Store \(Android\)](#), [Apple App Store \(IOS\)](#)

KSBTECH | Mobile Developer (Flutter)

Contract via Soft-Web Digital Ltd | 2021

Developed Flutter-based digital trading platform enabling Nigerian users to buy, sell, and exchange gift cards and digital assets securely. Implemented seamless gift card trading features with cash conversions and secure digital asset exchanges.

- Integrated payment gateways and crypto exchanges for fast, reliable transactions
- Built secure transaction flows with robust security measures for gift card and crypto trading
- Delivered production app with 10K+ Android downloads and strong user engagement

Published On: Google Play Store (Android), Apple App Store (iOS)

RECOGNITION & AWARDS

Consistency Award - Trove Finance (2025)

Recognized as most consistent and reliable team member for dedication and performance excellence

EDUCATION

BSc Computer Science

National Open University of Nigeria, Victoria Island, Lagos
